DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 99-118 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kanaba et al. (5870065) in view of Tsuru et al. (5530919).

Regarding Claims 99-118, Kanaba et al. show a technique, particularly in Fig. 2, for forming a coil conductor on three printed circuit boards 13b,c and d. It would have been obvious to the skilled artisan to employ such a multi-layer PCB to define the helical conductor in Although a mobile phone does not appear to be suggested in Kanaba et al, but mobile equipment is, the antenna therein is considered to be mounted in a housing of a phone. Tsuru et al. are cited as resolving the level of ordinary skill in the antenna art and shows an antenna 2,3 for use within the mobile phone 1. It would have been obvious to the skilled artisan to employ the Kanaba et al. antenna in the mobile phone of Tsuru et al. for the purpose of portability of a low-profile antenna.

Application/Control Number: 10/084,981 Page 3

Art Unit: 2821

Further regarding Claims 103 and 118, a lossy substrate would have been obvious to employ in lieu of the air layer for the purpose of providing dielectric loading.

Response to Arguments

3. Applicant's arguments with respect to claims 99-118 have been considered but are most in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Wimer whose telephone number is (571) 272-1833. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Douglas W. Owens can be reached on (571) 272-1662. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
